Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al in view of Boyd, Jr. Kim et al discloses the claimed invention except for the cage conductor. Boyd, Jr. teaches an electric motor having a cage conductor 26. It would be obvious to substitute, for the electric motor of Kim et al, an electric motor having a cage conductor, as taught in Boyd, Jr., for the purpose of providing an electric motor that is easier to manufacture.

3. Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al in view of Boyd, Jr. as applied to claims 1-4 above, and further in view of Tsuboe et al. Kim et al as modified by Boyd, Jr. above discloses the claimed invention except for the closed vessel receiving the compression mechanism part and the electric motor. Tsuboe et al teaches a compressor having the compression mechanism part and the electric motor together in a closed vessel. See Fig. 6. It would be obvious to provide the compression mechanism part and the electric motor of Kim et al mounted together in a closed vessel, in view of Tsuboe et al, for the purpose of protecting the compressor and the electric motor from damage.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
